

Department of Mechanical Engineering
Jalpaiguri Govt. Engg. College, (A Govt. Autonomous College)
Jalpaiguri– 735102
Syllabus for PG Classes effective from First July,2013

SEMESTER - I

Theory :

Sl. No	CODE	Paper	Contacts periods Per weeks			Totals	Credits
			L	T	P		
1.	MM(ME)101	Advanced Engineering Mathematics	3	1	0	4	4
2.	PTM-101	Production Management	4	0	0	4	4
3.	PTM-102	Production planning & Control	4	0	0	4	4
4.	PTM-103	Theory of Machining	4	0	0	4	4
5.	PTM-104 Elective –I	a. Operations Research b. Management Information system c. Production Planning & Material Management	4	0	0	4	4
Total of Theory						20	20

Practical :

Sl. No.	Code	Paper	Contacts period per week			Total	Credits
			L	T	P		
1.	PTM-191	Computer Aided design Lab.	0	0	4	4	2
2.	PTM-192	Computer Aided Manufacturing Lab.	0	0	4	4	2
3.	PTM-181	Seminar- I	0	2	0	2	1
Total of Practical						10	5
Total :						30	25

SEMESTER-II

Theory :

Sl. No.	Code	Paper	Contacts periods per weeks			Total	Credits
			L	T	P		
1.	PTM-201	Automation in Manufacturing system & Process	4	0	0	4	4
2.	PTM-202	Non Traditional machining Processes	4	0	0	4	4
3.	PTM-203	Quality assessment & Control	4	0	0	4	4
4.	PTM-204 Elective-II	a.. Robot Application & Design b. Computer Aided Design & Manufacturing c. Industrial Tribology	4	0	0	4	4
5.	PTM-205 Elective– III	a. Energy Management & Audit b. Supply Chain Management	4	0	0	4	4
Total of Theory						20	20

Practical :

Sl. No.	Code	Paper	Contacts periods per week			Total	Credits
			L	T	P		
1.	PTM-281	Seminar – II	0	2	0	2	1
2.	PTM-291	Manufacturing System& Process Lab.	0	0	4	4	2
3.	PTM-282	Comprehensive Exam (Viva-Voce)	0	0	0	0	4
						6	7
Total :						26	27

Department of Mechanical Engineering
Jalpaiguri Govt. Engg. College, (A Govt. Autonomous College)
Jalpaiguri– 735102
Syllabus for PG Classes effective from First July,2013

SEMESTER-III

Sessional :

Sl. No.	Code	Paper	Contacts periods per week			Total	Credits
1.	PTM-381	Pre-Submission Defense of dissertation	0	0	0	0	4
2.	PTM-382	Dissertation (Progress)	0	0	24	24	18
Total :							22

SEMESTER - IV

Sessional :

Sl.no.	Code	Paper	Contacts periods per week			Total	Credits
1	PTM-481	Dissertation (Completion)	0	0	24	24	18
2.	PTM-482	Post submission Defense of Dissertation	0	0	0	0	6
Total :							24

Department of Mechanical Engineering
Jalpaiguri Govt. Engg. College, (A Govt. Autonomous College)
Jalpaiguri– 735102
Syllabus for PG Classes effective from First July,2013

SEMESTER - I

MM (ME) – 101: 3-1-0-4-4 : Advanced Engineering Mathematics

Statistics : Elements of statistics frequency distribution, concept of mean, median, mode and different types of Distribution, standard deviation and variance, curve fitting by least square method, correlation and regression, Testing of hypothesis, Basic types of factorial design and analysis of variance.

Matrix Operation : Matrix operation, Eigen Value and Eigen vector by Iterative methods, Diagonalization of a square matrix.

Integral Transforms: Laplace Transform , Fourier Transform, Fourier Integral and their applications

Numerical Methods: Interpolation by polynomials; Error analysis; solution of system of linear equation by Gauss-Seidel iterative methods, Newton Raphson methods , Numerical Integration by Gauss- quadrature; Solution of ordinary differential equation by Rayleigh Ritz method.

Ordinary Differential Equation: i) 2nd order homogeneous Equation ii) Euler Cauchy Equation iii) Non homogeneous linear equation.

Partial Differential Equation: i) Wave equation- one dimension and two dimension. ii) Heat equation - one dimension and two dimension (Deviation and Solution by the method of separation of variables and integral transforms).

1. "Introductory Methods of Numerical Analysis" - S. S. Sastry, PHI.
2. "An Outline of Statistical Theory" Volume I, II, -A.M. Goon, M. K. Gupta, B.Dasgupta, The World Press Private
3. "The Design of Experiments to find Optimal Conditions" - Yu. P. Adler, E. V. Markova, Ylu V. Granovsky,
4. Erwin Kreyszig Advanced Engineering Mathematics – John Wiley & Sons Inc.
5. Stanley Grossman and William R. Derrick Advanced Engineering Mathematics, Harper & Publishers.
6. "Numerical Methods for Scientific and Engg. Computation", M.K.Jain, S.R.K.Iyenger and R.K.Jain, New Age

PTM 101 :4-0-0-4-4 Production Management

Introduction to production / operations management for competitiveness of corporate, Product life cycle, types of productive systems, process life cycles and technology, focus of an organization.

Forecasting, inventory planning and control, MRP, operations scheduling, statistical quality control.

Product and process design and technological choice, capital cost and criteria for investment, capacity planning, MRP-II, location theory and distribution, work measurement, facility layout and assembly line balancing, multiple criteria decision making methods.

Generic enterprise strategies, role of productivity improvement, components of operations strategy and its implementation, Operations systems of the future; Computer integrated factory of the future, customer-centric system.

References:

1. Industrial Sociology – E.V. Schneider, McGraw-Hill, 1982.
2. Industrial Sociology-D.C. Miller & W.H. Form Herper & row , 1980.
3. The Sociology of Industry – S.R. Parlar, R.K. Brown & Others, George Allen & Unwin,1970.
4. The Affluent Worker in the class structure – J.H. Goldtherpe, etc. All Cambridge University Press.

PTM102 :4-0-04-4 Production Planning and Control

Organisation: Organisational structure, types of organisation structure, multi-plant organisation.

Production, Types of Production System and its element, Generalized model Production System. Products and Services, Design & Development.

Forecasting: Importance the marketing interface, the materials interface, Basic Techniques.

System Economics: Tactics & Strategies, Break-Even-Analysis, Life Cycle analysis and capacity planning.

The plant or facilities - Location and design of the plant or facilities, Layout of the facilities, Equipment selection, Maintenance of the facilities and equipment. Material and Inventory Management

Demand analysis, Resource Planning, Aggregate Production Planning, Line Balancing. Materials requirement

Department of Mechanical Engineering
Jalpaiguri Govt. Engg. College, (A Govt. Autonomous College)
Jalpaiguri– 735102

Syllabus for PG Classes effective from First July,2013

planning, Sequencing and Scheduling . Human Factors, Manpower planning, Placement, Training, Motivation, Safety. Production Monitoring and Control, Performance Criteria and evaluation, Case Studies and Example.

References:

1. "Production and Operations Management" - E. S. Buffa, New Age International (P) Ltd., New Delhi.
2. "Production Systems: Planning, analysis and Control" - J. L. Riggs, John Wiley & Sons, New York.
3. "Production and Operations Management" - S. N. Chary, Tata McGraw-Hill Publishing Co. Ltd., New Delhi

PTM 103 :4-0-0-4-4 Theory of Machining .

Machining definition and objectives. Geometry of cutting tools; turning, milling and drilling - in different reference systems like machine reference systems, tool reference system and work reference systems. Sharpening and re-sharpening of cutting tools. Mechanism of chip formation by single point tools, drills and milling cutters. Types of chips and their characteristics. Effective rake. Mechanics of machining, theoretical estimation and experimental determination of cutting forces and experimental determination of cutting forces & power consumption. Dynamometers; types, design, construction and use. Thermodynamics of machining, sources of heat generation, cutting temperature modeling, measurement of cutting temperature. Cutting fluids; purpose, essential characteristics, selection and methods of application. Cutting tools; methods of failure, mechanics of tool wear, essential properties, assessment of tool life and cutting tool materials. Economics of machining; principal objectives, main parameters and their role on cutting forces, cutting temperature, tool life and surface quality, selection of optimum combination of parameters. Advanced machining techniques- cryo machining & high speed machining Causes of vibration and chatter in machining, and their remedy. Mechanics of grinding, characteristics, specification and selection of grinding wheels. Process and wheel parameters in grinding. Grinding forces, grinding fluid applications, grinding ratios and surface integrity. Advanced techniques of grinding and modern grinding wheels.

2. "Metal Cutting Principles" - M. C. Shaw, Oxford University Press CBS
3. "Fundamentals of Metal Machining & Machine Tools" - G. Boothroyd, McGraw Hill
4. "Introduction to Machining Science" - G. K. Lal ,New Age International Pub., New Delhi
5. "Metal Cutting Theory and Cutting Tool Design" - V. Arshinov and G. Alekseev Mir Publishers, Moscow
6. "Manufacturing Science" - A. Ghosh and A. K. Mallik, Affiliated East-West Press Pvt. Ltd., New Delhi
7. "Metal Cutting" - E. M. Trent and P. K. Wright, Butterworth Heinemann Publication
8. "Metal Cutting Mechanics" - N. N. Zorev, Pergamon Press.
9. "Grindings Technology: Theory and Application of Machining with abrasives" - S.Malkin, Ellis Harwood Publication, U. K., 1990
10. "Micromachines" - I. Fujimasa, Oxford Univ. Press.

PTM 104(a) :4-0-0-4-4 Operations Research

Introduction to operations research (OR); History of OR; Principles of modeling, Impact of OR; Implementation of OR projects; Different OR problems.

Linear Programming (LP); Introduction, LP model, problem formulation, examples and case studies, limitations of LP, geometrical interpretation, essence of simplex method, algebra of simplex method, simplex procedure, degeneracy and other complications, dual simplex method, economic interpretation of duality, sensitivity analysis, computer implementation.

Simplex explanation of solution methods of Transportation problem and Assignment problem.

Decision Theory: Structure of decision making problem; Types of Decision making criteria; Decision tree analysis; Utility theory and decision making.

Project scheduling: Critical Path Method (CPM), Network construction and determination of critical path, Crashing, Resource smoothing, Resource leveling, PERT .

Non Linear Programming: Graphical illustrations; Integer Linear Programming applications, Graphical solution, branch and bound solution; Dynamic programming.

Department of Mechanical Engineering
Jalpaiguri Govt. Engg. College, (A Govt. Autonomous College)
Jalpaiguri– 735102

Syllabus for PG Classes effective from First July,2013

Inventory Models: EOQ model, Sensitivity analysis in EOQ model, economic lot size model, EOQ with planned shortage, quantity discounts for EOQ model, probabilistic models.

Waiting Line Models; Structure single channel waiting line model, Multiple channel waiting line models, economic analysis of waiting lines.

Forecasting Techniques.

4. "An Introduction to Management Science" - Anderson, Sweeney, Williams, West Publishing Co.
5. "Operations Research: An Introduction"- H. A. Taha, PHI
6. "Operations Research : Theory and applications" - J. K . Sharma, MacMillan.

PTM 104(b) :4-0-0-4-4 Management Information System

An Overview of Management Information Systems, Structure of a Management Information System, Need of MIS Hardware, Software and Communication Technology for Information Systems. Storage and Retrieval of Data, Transaction Processing, Office Automation and Information Processing.

Data processing Systems, The Decision Making Process, Concepts of Information, Human as Information Processors, System concepts, Concepts of Planning and Control, Real Time Systems, Organizational Structure and Management Concepts. Case Studies.

Supports System for Planning Control and Decision Making, Support Systems for Management of Knowledge Work. Data Communication hardware, Computer Networks, Developing a Long Range Information system Plan, Strategies for the Determination of Information Requirements, Database Requirements, User Interface Requirements.

Data sources and Data Management, Hierarchy of data organisation, Design & development of Application Systems, Quality assurance and Evaluation of Information Systems, Organization and Management of the Information Resources function, Future Developments and Their Organizational and Social Implications. Elements of software Engineering-models design issue.

References:

4. Th. & Prob. On Quantitative Techniques, Management information system & Data processing – S.K. Chakaraborty, New Central Book Agency.
5. Software Project Management- B. Hughes & M.Cotterell, 2nd ed.

PTM-104(c): 4-0-0-4-4; PRODUCTION PLANNING & MATERIALS MANAGEMENT

Production Planning & Control; Industrial: Job-shop planning.

Demand Forecasting- Methods & Uses

JIT Manufacturing-Kanban System

Synchronous Manufacturing & Theory of Constraints

Operations Strategies, Hierarchical Planning System-Aggregate Planning & Manufacturing Resource Planning.

Materials Management Concepts & Objectives for materials function, administrative practices, purchasing system purchasing cycle, Make or Buy decisions, Vendor Development & Evaluation, Inventory Planning Control & Management. Selective Inventory Control. EOQ Models & variants safety stock stocking policy & Procedure Manuals.

Demand Assessment, Materials Requirement Planning.

Material Handling, Physical Distribution & logistics Standardizations

Computer application in Material Management & MIS.

PEM 191: 0-0-4-4-2 : COMPUTER AIDED DESIGN LABORATORY Experiments & Assign ments Would be based on the theory subject, computer aided design & Analysis, such as;

- . Solving simple structure problems through computer programmers.
- . Designing through AUTO CAD , Mechanical Desktop, IDEAS, CATIA,PRO-engineers like softwares.
- . Stress Analysis using softwares like ANSYS, etc.

PTM – 192: 0-0-4-4-2 : COMPUTER AIDED MANUFACTURING LAB

Experiments & assignments would be based on the theory subject, Computer Aided Manufacturing Lab., such as :

- . Solving simple structure problems through computer programs.

PTM 181 :0-0-2-2-1: SEMINAR

It would be based on literature review on some emerging areas related to this course. Seminar presentation would be made by an individual student & a term paper would have to be submitted by each student separately.

SEMESTER - II

PTM 201 :4-0-0-4-4 Automation in Manufacturing Systems and Processes

Review of basic principles of automation, type and degree of automation, hard automation, flexible automation, stand alone automatic machine tools, transfer machines.

Introduction to computer aided manufacturing (CAM) systems, basic building blocks of computer integrated manufacturing (CIM).

Numerical Control Machines and Systems- CNC, DNC (Direct and Distributed), FMC, FMS; planning and programming CNC machine tools,. EDM and other forming machines, toolings of CNC machines; adaptive control systems, tool. and work handling systems involving robot, AGV and AS/RS and detailed part programming using G and M codes, APT, etc.

Robotics; types, anatomy, drives, kinematics, controls, and applications of the robot.

Automatic inspection systems, use of coordinate measuring machines (CMM), control systems, process monitoring.

Manufacturing from product design- concept of group technology (GT), CAD-CAM interface, CAPP, computer aided production planning and control.

References:

1. "Automation, Production Systems, and Computer-Integrated Manufacturing" M.P. Groover, Prentice Hall of India.
2. "CAD/CAM - Theory and Practice", Ibrahim Zeid, Tata McGraw-Hill PublishingCo. Ltd., New Delhi.

Department of Mechanical Engineering
Jalpaiguri Govt. Engg. College, (A Govt. Autonomous College)
Jalpaiguri– 735102

Syllabus for PG Classes effective from First July,2013

3. "CAD/CAM" - M. P. Groover and E. W. Zimmers Jr., Prentice Hall of India
4. "CAD/CAM/CIM"- P. Radhakrishnan, S. Subramanyan and V. Raju, New Age International Publishers.
5. "Computer Aided Manufacturing"- P.N. Rao, N.K. Tewari and T.K. Kundra, Tata McGraw- Hill Publication.
6. "Robotics Technology and Flexible Automation"- S.R. Deb, Tata McGraw-Hill Publication.
7. "Industrial Robots and Computer Integrated Manufacturing"- S. Kumar, Oxford & IBH Publishing Co. Ltd.
8. "Computer-Aided Production Management"- P.B. Mahapatra, Prentice Hall of India.

PTM 202 :4-0-0-4-4 Non-Traditional Machining Processes

Non traditional machining: Introduction, Specific Applications and Advantages over Traditional Machining Processes. Mechanical processes; Ultrasonic Machining, Abrasive Jet Machining, Water Jet Machining, and Abrasive Water Jet Machining; Process details, parametric effects, recent advancements and modelling.

Thermal processes; Electro discharge Machining, Plasma Arc Machining, Electron Beam Machining, and Laser Beam Machining; process, parameters, recent advances and modeling.

Chemical and Electrochemical processes; Chemical Machining, Electro Chemical Machining and Electrochemical grinding. Hybrid-type systems; Electro Chemical Discharge Machining, Ultrasonic assisted Electro Discharge Machining and other types, Micro and Nano machining, Environment friendly machining.

References:

1. "Modern Machining Processes"- P.C. Pandey and H.S. Shan, Tata McGraw-Hill Publication.
2. "Non-Conventional Machining"- P.K.Mishra, Narosa Publishers.
3. "Manufacturing Science"- A.Ghosh and A.K. Mallik, E~st-West Publications.
4. "Laser Machining and Welding"- N. Rykalin, A. Uglov and A. Kokora, Mir Publishers, Moscow.
5. "Manufacturing Engineering and Technology"- S. Kalpakjian, Addison Wesley.
6. "Materials and Processes in Manufacturing"- E.P. DeGarmo, J.T. Black and R.A. Kohser, Prentice Hall of India.
7. "A Text Book of Production Technology" - O.P. Khanna and M. Lal, Dhanpat Rai and Sons.
8. "Rapid Prototyping: A Brief Introduction"- A. Ghosh, East West Publication.
9. "Manufacturing Processes"- Amstead, Ostwald and Begeman, John Wiley and Sons.
10. "Micromachines", I. Fujimasa, Oxford University Press.
11. "Precision Engineering in Manufacturing", R.L.Murty, New Age International Publishers.

PTM 203 :4-0-0-4-4 Quality Assessment and Control

Basic concepts, definitions and history of quality control, Quality function and concept of quality cycle, Quality policy and objectives, Quality considerations in design, Economics of quality and measurement of the cost of quality, definitions, classifications, Quality Cost Matrix, Evaluation of Quality Costs.

Process control: Machine and process capability analysis. Use of control charts and process engineering techniques for implementing the quality plan.

Total Quality Control and Management, definition, vision and philosophy, Concepts of TQM, Concepts of customer centered environment, Golden Rules of TQM, the PDCA Cycle, Tools and Techniques, Implementation of TQM, Waste Elimination, the 5S campaign, Flow Chart, Pareto analysis, Cause and Effect Diagram, Force Field Analysis, Brain Storming, Quality Circle, Quality Function Deployment, Just-In- Time Approach, Quality Standards, ISO 9000 Standard, Implementation and Registration.

6. "Quality Control and Industrial Statistics"- A.J. Duncan, Richard D. Irwin Inc., USA.
7. "Introduction to ISO 9000 and Total Quality Management"- S. K. Ghosh, Oxford Publishing House, 1994

Department of Mechanical Engineering
Jalpaiguri Govt. Engg. College, (A Govt. Autonomous College)
Jalpaiguri– 735102

Syllabus for PG Classes effective from First July,2013

PTM 204(a) :4-0-0-4-4 Robot Application & Design

Robot definition: Robotic systems - Its role in automated manufacturing; robot anatomy; robot classifications and specifications.

Robot kinematics, forward and reverse transformations, homogeneous transformation,

Robot Dynamics: Introduction to Force Analysis, Trajectory generation

Robot actuators and control; Pneumatic, hydraulic and electrical drives and controls used in robots. Robot end-effectors- mechanical, magnetic and vacuum grippers, gripping forces RCC and design features of grippers. Robot sensors- contact and non-contact sensors, Robot vision and their interfaces.

Robot languages and programming techniques.

Applications of robots in materials handling, machine loading/unloading, inspection, welding, spray painting and finish coating, and assembly, etc.

Economic performance and evaluation strategies, Robot installation and planning. Safety features.

References:

4. "Foundations of Robotics Analysis and Control"- T. Yoshikawa, Prentice Hall of India.
5. "Robotics for Engineers"- Y. Koren, McGraw-Hill Book Company, New York.
6. "Industrial Robots and Computer Integrated Manufacturing"- S. Kumar, Oxford & IBH Publishing Co. Ltd.
7. "Automation, Production Systems, and Computer-Integrated Manufacturing" M. P. Groover, PHI
8. "Computer Aided Manufacturing"- P.N. Rao, N.K. Tewari and T.K. Kundra, Tata McGraw-Hill Publication.
9. "Robotics: Control, Sensing, Vision and Intelligence"- K.S. Fu, R.C. Gonzales and C.S.G. Lee, McGraw Hill,
10. "Analytical Robotics and Mechatronics", W. Stadler, McGraw Hill Book Co.

PET 204(b) :4-0-0-4-4: Computer Aided Design and Manufacturing

Basic concepts of product design. Different phases of computer aided design (CAD), integration of CAD-CAM, system software, benefits of CAD

Elements of interactive computer graphics (ICG); introduction, point and line plotting and display techniques, 2D and 3D transformation, concatenation, clipping, segmentation, 2D and 3D graphics, input and output devices, raster scan graphics systems.

Geometric modeling; wire-frame, surface and solid modeling techniques.

Computer-aided drafting; drafting packages, dimensions, text, shading, hatching, etc. of mechanical components.

Engineering analysis; design reviews and evaluation.

Element of CAM/CIM systems; CNC Machines, DNC, FMS, Machining Centre, A.C. Systems, different handling and robotic configurations employed; Computer Integrated Production Planning and Control; MRP, MRP-II, CAPP, CAI and CAQC, Application of softwares. Interfacing of CAD with CAM; manufacturing data generated from CAD data.

Jalpaiguri– 735102

Syllabus for PG Classes effective from First July, 2013

10. "Industrial Robots and Computer Integrated Manufacturing"- S. Kumar, Oxford & IBH Publishing Co. Ltd.
11. "Computer-Aided Production Management"- P.B. Mahapatra, Prentice Hall of India.
12. "Automation, Production Systems, and Computer-Integrated Manufacturing" M.P. Groover, Prentice Hall of India.

PTM 204(c) :4-0-0-4-4 Industrial Tribology

Introduction to tribological systems, economic aspects, lubrication of bearings, friction control and wear prevention, properties and testing of lubricants, mechanisms of fluid flow- Reynold's equation and its limitations.

Idealized hydrodynamic bearing, plane slider bearings, journal bearings- finite and infinite, finite bearing, numerical solution, bearing design, fluid inertia and turbulence, hydrodynamic instability.

Squeeze film bearing, thrust and journal bearing, gas lubricated bearing, hydrodynamic bearings, hydrostatic bearings, porous bearings, elasto-hydrodynamic lubrication, solid lubricants.

Physico-mechanical interactions at interfacial contact, surfaces; Analysis and assessment of topography; tribo- models for asperity contact, frictional resistance and wear; Frictional instability and stick-slip phenomenon; Models of adhesion-diffusion wear process; Kinetics of solid state interfacial interactions.

PTM – 205 (a) : 4-0-0-4-4: ENERGY MANAGEMENT AND AUDIT

Introduction, Energy Scenario : Commercial and Non-Commercial Energy, Primary Energy Production, Final Energy Consumption, Energy Needs of Growing Economy, Long term Energy Scenario, Energy and Environment : Air pollution, Climate Change, Energy Security, Energy Conservation and its importance, Energy Strategy for the Future, Sustainable Development.

Basics of Energy and its various forms : Electricity basics – DC & AC currents, Load Management and Maximum demand control. Thermal basics – Fuels, Thermal energy content of fuel, Sensible and Latent heat, Evaporation, Condensation, Steam, Humidity, Heat transfer.

Energy Management & Audit : Definition, Energy audit-need, Types of energy audit, Energy management (audit) approach – understanding energy costs, Bench marking, Energy performance, Matching energy use to requirement, Maximizing system efficiencies, Optimizing the input energy requirement, Fuel and Energy substitution, Energy audit instruments.

Material and Energy balance : Methods for preparing process flow, Material and energy balance diagrams.

Financial Management : Investment-need, Appraisal and criteria, Financial analysis techniques – Simple pay back period, Return on investment, Net present value, Internal rate of return, Cash flows, Risks and sensitivity analysis; Financing options, Energy performance contracts and role of ESCOs (Energy Service Companies).

Department of Mechanical Engineering
Jalpaiguri Govt. Engg. College, (A Govt. Autonomous College)
Jalpaiguri– 735102

Syllabus for PG Classes effective from First July,2013

Energy Monitoring and Targeting : Defining monitoring & targeting, Elements of monitoring & targeting, Data and information analysis, Techniques – energy consumption, Production, Cumulative sum of differences (CUSUM).

Energy Performance Assessment of Furnace, Pumps, HVAC System, Variable Speed Drives, and Lighting System : Purpose, Performance terms and definitions, methods, efficiency calculation, factors affecting performances, Energy conservation opportunities.

Application of Non Conventional and Renewable Energy Sources : Different forms of renewable energies, Their applications for energy conservation.

Books :

1. Albert Thumann: Plant Engineers & Managers Guide to Energy Conservation (Fairmont Press)
2. Wayhe C. Tuner : Energy Management Handbook (Wiley Interscience Publication)
3. Anthony J. Pansini. : Engineering Economic Analysis Guide Book (Fairmont Press)
4. D. Paul-Mehta : Handbook of Energy Engineering. (Fairmont Press / Prentice Hall (Sd))
5. Paul O'Callaghan : Energy Management. (McGraw Hill Professional Publication)
6. Books of Energy Management & Auditors, Bureau of Energy Efficiency, (A Statutory body under Ministry of Power, Government of India)

PTM 205(b) : 4-0-0-4-4: Supply Chain Management

Introduction: Understanding logistics and supply chain management (SCM); wholistic approach to physical flow; customer focus in SCM: efficient customer response (ECR), quick response (QR), accurate response (AR), corporate goal through competitive advantage, push and pull type system.

Inbound and Outbound Logistic: SCM integration considering material flow, information flow and cash flow; Bullwhip effect, transportation and warehousing.

Cost Analysis: Historical costing, standard costing and estimated costs, marginal costs, concept of cost drivers; activity based costing (ABC), through put accounting.

Benchmarking for SCM: Techniques of performance measurement and its barriers and evaluation of SCM.

Transportation and Warehousing Location: Multi-model transport operation, routing, scheduling, fleet size insurances, sales tax, outsourcing, 3rd and 4th party logistics.

IT and Its Applications in SCM: MRP, ERP, distribution resource planning (DRP/DRPB) and designing SCM.

Supply chain management in service sector, global market and global sourcing, supplier alliance, supplier quality control, supplier chain re-engineering.

Green supply chain management.

PTM 281 :-0-0-2-2-1 Seminar - II

Seminar would be based on literature review on some emerging areas related to this course. Seminar presentation would be made by an individual student, and a report would have to be submitted by each student separately.

Assignment would be given to each student by the teacher concerned on development of some model/ special software package/ set-up for laboratory experiments etc. Each student will have to submit a report and appear for the viva-voce.

PTM 291 :0-0-4-4-2 Manufacturing Systems and Process Laboratory

Experiments on computer aided manufacturing systems, such as;

- Part programming on a CNC lathe
- Part programming on a CNC milling / machining center
- Using Master CAM for making a job from AutoCAD drafting
- Computer Aided Process Planning
- Robotic Programming
- Electric Discharge Machining

Department of Mechanical Engineering
Jalpaiguri Govt. Engg. College, (A Govt. Autonomous College)
Jalpaiguri– 735102

Syllabus for PG Classes effective from First July,2013

- Testing for alignment/ error in machine tools
- Finding out speed ratios and constructing ray diagrams of machine tools. Machine Tool Vibration
- Mechatronic elements in automated machine tools
- Design of elements of machine tools

PTM-282: Comprehensive Exam.(Viva – Voce)

SEMESTER – III

PTM – 381 : 0-0-0-4 Pre – Submission Defence of Dissertation

Project work would be of two – semester duration and one project would be allotted to one student . The project work done upto the end of the third semester would be evaluated and the evaluation will be internal evaluation . The total credit will be divided in the following way :

Synopsis – semester	: 20 %
Thesis	: 40 %
Viva	: 40 %

PTM – 382 : 0-0-24-24-18 Dissertation (Progress)

Viva voce of the project will be based on the project thesis to be conducted at the end of the semester – III .

SEMESTER – IV

PTM – 481 : 0-0 Dissertation (Completion)

Project work would be of two – semester duration and one project would be allotted to one student . The project work done upto the end of the fourth semester would be evaluated and the evaluation will be internal evaluation . The total credit will be divided in the following way :

Synopsis – semester	: 20 %
Thesis	: 40 %
Viva	: 40 %

PTM – 482 : 0-0-0-6: Post - submission Defence of Dissertation

Viva voce of the project will be based on the project thesis to be conducted at the end of the semester – Iv .
